The Housekeeper Does Nothing

AS IMPORTANT AS BUYING GROCERIES—

Nothing anywhere as important except possibly to cook them.

Poor groceries cannot be turned into good food—no matter how expert the cook may be.

A dollar saved by buying cheap groceries will likely turn out to be TWO wasted.

A loss of nourishment.

A waste of eatables.

A lack of relish.

We invite all particular housewives to test the goodness of our groceries—then to act as they find them.

Put Your Money

Where You Can Put Your Trust. Where You Know It Will Be Safe. Where You Can Get It When You Want It. Where It Will Yield You the Utmost Possible Benefits.

This bank's success rests upon its fidelity to the trust of its patrons. Its fundamental honesty and the character of its officers back up its financial strength.

We are right here at home. You know us. We want you to watch the statements which show the condition of our bank. This is a live and growing bank, abreast of the most advanced methods, yet watchful and conservative in every respect. We are equipped to handle all your banking business promptly and satisfactorily, and give you free service in many ways. Your transactions are always absolutely secret.

We welcome your account, however small, and every dollar deposited, besides standing to your credit, becomes productive capital for the good of the home community.

Christian Science Services

In Odd Fellows' Hall every Sunday morning, at 11 o'clock. Subject for Sept. 7th.—Man, Sunday School at 12:15. The public is cordially invited.

Congregational Church

"The Friendly Church just around the Corner."

Next Sunday, Sept. 7 will be the Tenth Anniversary of the pastorate of Mr. Atkinson. The morning sermon will be somewhat along that line. It is hoped all the members will be present. Reception of members, and a talk to the boys and girls on "Not Money Enough." Junior and Senior Endeavor at the usual times. Union Meeting in the evening. This will be in the nature of a Fellowship Meeting. Rev. L. D. Rathbone, our State Supt.; Rev. C. W. Merrill, our oldest settled Pastor in this Association—and Rev. Mr. Wilson will all be present and speak briefly. All are invited.
GEO. E. ATKINSON, Pastor.

Local and Personal

Let the Press print it for you. Mrs. Austin of Sunnyside is reported quite ill.

Ben Rodeck is attending the College of the Pacific this year.

F. W. Shaw moved into San Jose today where he will live thru the winter.

Dr. and Mrs. C. N. Cooper went to Pacific Grove Wednesday for a short visit.

Pictures taken on Mt. Hamilton trip last Saturday are at this office. Order at once.

The W. C. T. U. will meet with Mrs. Poor on Wednesday, Sept. 10th at 2:30 o'clock.

J. L. Hagelin and E. E. Seagren returned Tuesday evening from a business trip to Turlock.

Little Audrey Thompson is out from the Willows visiting her grandpa, D. S. Thompson and family.

Miss Charlotte Davis left Saturday for Denair, Cal., where she will teach school for the year.

B. K. Denbigh and son and Frank Nelson constituted a surprise party at the S. G. Nelson home Sunday for dinner.

For Sale—Dining room set complete and other household goods, at 55 South Central ave. Mrs. Van de Gritt

Carl Scholz went to Palo Alto Wednesday where he has entered Stanford, taking the electrical engineering course.

Miss Juliette Billiou returned Monday after a two month's vacation in Northern California visiting friends and relatives.

The Misses Palmer arrived Wednesday from Mt. Hermon for a visit with their friend, Mrs. S. G. Nelson, and family.

Mrs. Samuel Thompson and daughter, little Evelyn arrived Sunday from Berkeley for a visit with her mother, Mrs. Huntley.

LOST—Somewhere between Congregational church and Sunnyside, a lady's gold pin. Finder please return to this office and receive reward.

Mrs. Bush who has been making her annual visit with her old friend, Mrs. Wm. Alexander, for two weeks, returned to her home in San Francisco Sunday.

Mr. and Mrs. C. W. Reynolds of San Luis Obispo were here Sunday the guests of their cousins, Mr. and Mrs. S. R. Wade. Mrs. Reynolds remained to visit during the week.

Mr. and Mrs. R. K. Thomas returned in their auto from their summer sojourn at Pacific Grove. Mr. Thomas says his stay here will depend on how well his neighbors treat him.

Misses Mabel Oliver and Lois Bohnett spent the week-end at Ben Lomond. Mrs. D. R. Oliver and children, David, Jr., and Hazel, went to Ben Lomond Tuesday for a week's outing.

R. W. Kennedy returned last week from his vacation in the San Joaquin and is running his pumping plant again. Mr. K. says that water is more plentiful over the range than here but things don't look any better.

George Matthiessen, Robert Williams and Lyle Trevor went up to the Cypress ranch south of Los Gatos Sunday to enjoy the last day with the spiked game. Before the day was over they had brought down one and George picked off a nice big rattler with ten rattles and a button.

The two crowds that went to Mt. Hamilton had such a glorious time that a third party is now being planned. The start will be made from the Bank of Campbell Corner at 12 o'clock, Sept. 13. Anyone wishing to go should make his registration at the bank at once. The party is limited to thirty.

The residents of Sunnyside district have petitioned Supervisor John Roll to have the Sunnyside avenue graded and surfaced to give them a good road at all seasons. And "by Heck" they deserve it. The petitioners will furnish part of the gravel for the work and will do their part to facilitate the improvement which is greatly needed.

Thos. Price, our hustling druggist, went to Vacaville, Tuesday, to look after his ranch interests there. During his absence, L. M. Beall of Richmond is managing the drug store. Mr. Beall was a former resident of Campbell and was a pharmacist at the Watkins drug store in Los Gatos for about eight years and is more or less acquainted here. He notes great changes in Campbell since he was here before.

Mr. and Mrs. L. W. Wilder, uncle and aunt of G. H. Hubbard, and their son, A. E., arrived last week from Cloud county, Kansas. Mr. Wilder has purchased a home north of the Vendome hotel on 1st Street in San Jose and with his family will live there. The son expects to get a position in a clothing store in this part of the state. They were converted to this country by the delightful climate they found here on a visit some time ago.

Art Covers and Colored Bristol Board at the Press office.

Al. Bulmore has accepted a position in the Capitol Market Co.'s local shop.

Mrs. P. G. Keith returned home Wednesday after an extended visit in San Francisco.

Miss Myra Giles, a prominent teacher of Northern California, is visiting her sisters, Mrs. R. W. Kennedy and Mrs. E. Fritz.

Georgia Cochran arrived home Sunday from a six week's visit with relatives at the Ridgewood ranch near Willets, Mendocino county.

Rev. and Mrs. John F. Wilson expect to go to Pacific Grove Tuesday to attend the annual M. E. Conference.

Miss Winnie Fablinger returned to Turlock Sunday to resume her school duties for the ensuing year.

Mr. Geo. Wilson, a dairy rancher near Los Angeles was here Wednesday evening for a short visit with his brother, the Rev. J. F. Wilson and family.

Some of the boys have received recent letters from our old friend, A. J. Vogt, who is enjoying himself in Campbell canyon at present with fishing and hunting of all kinds. He sent his regards to the bunch.

The fourth quarterly conference of the local M. E. Church was held at the church Friday evening, W. C. Evans, presiding. The delegates elected to the Layman's Association at Pacific Grove were, Mrs. E. Davidson, S. G. Rodeck, N. G. Finley and H. C. Schnackenburg. The association will meet during the annual conference of the San Francisco district of Methodist Episcopal Churches. The official board of the church met Wednesday evening and closed the accounts of the year.

MOVED TO MORGAN HILL

Mrs. Gerken and younger children went to Morgan Hill Wednesday where they will make their future home. The boys will go this week. The entire family have made good citizens and Campbell's loss will be Morgan Hill's gain. Elton who is a strong debater will be greatly missed in the school ranks as will also the rest of the children.

The entire family has made many friends who wish them well in their new home and will welcome them back at any future time should they return.

From the Editorial

View Point

A rural editor appeals to his subscribers thus: If you have frequent headaches, dizziness and fainting spells, accompanied by chills, cramps, chilblains, epilepsy and jaundice, it is a sign that you are not well, but are liable to die any minute. Pay your subscription a year in advance and thus make yourself solid for a good obituary notice.—Santa Clara Journal.

My friend, help the editor in his wild-eyed search for news. When your friends come to visit you, if you are not ashamed of it, tell him; when your wife gives a tea party, if you have recovered from the effects of the gossip, drop in with the news; when a new baby arrives fill your pockets with cigars and call; if you go to a party, steal some of the good things and leave them at our sanctum.—Sunnyvale Sun.

It is a queer idea that many good people seem to have about subscriptions to newspapers. Some of them get mad as blazes if a statement is sent to them, and others get mad as blazes if a statement is not sent; some consider it a crime on the part of a publisher who lets the paper go along beyond the time for which it has been paid, while others have a cat-fit if their paper is stopped at the expiration of the time. It's a queer business, but we are queer ourselves, and so we like it.—Mountain View Register-Leader.

Stollwerck's Cocoa

is making quite a hit. Comes in two kinds—plain cocoa and milk cocoa. A 10c can of one kind free with a 25c purchase of the other. This brand formerly sold at 50c.

TRICKS OF MIND READING

Where the Subject Involuntarily Furnishes a Clue That Lays Secret Bare.

We all know one kind of mind reading which looks very astonishing and yet which there is no difficulty at all in explaining. It is a favorite performance on the stage, and not seldom tried as a parlor game. I refer to the kind of mind reading in which one person thinks of a hidden coin, and the other holds his wrist and is then able to find the secreted object, writes Bruno Munsterberg in the Metropolit.

There is no mystery in such a transmission of the idea, because it is the result of small unintentional movements of the arm. The person who thinks hard of the corner of a room in which the coin placed, not help giving small impulses in direction. He himself is not aware of these faint movements, but a man who has a fine sense of touch becomes conscious of these movements in the wrists which his fingers grasp, and under the guidance of these slight movements he is led to the particular place.

A very neat form of the same type is often seen on the stage, when the performer is to read a series of numbers in the mind of some one who thing intensely of the figures. Some one in the audience thinks of the number 57. The performer asks him to think of the first figure then he grasps his hand and counts slowly from zero to nine. After that he asks him to think of the second figure and counts once more. Immediately after he will announce rightly the two digits. Again there was no mystery in it. He knows that the man who thinks of the figure five will make a slight involuntary movement when the five is reached in counting, and the same movement will occur at the seven in the second counting. If he is very well treated, he will not need the touching of the hand; he will perform the same experiment with figures without any actual contact whatever. It will be sufficient to see the man who is thinking of a figure while he himself is counting. As soon as the dangerous digit is reached the man will give some unintentional sign. Perhaps his breathing will become a degree deeper or stop for a moment, his eyelids may make a reflex movement, his fingers may contract a bit. This remains entirely unnoticed by any one in the audience, but the professional mind reader has heightened his sensibility so much that none of these involuntary signs escape him. Yet from the standpoint of science his seeing these subtle signs is on principle no different from our ordinary seeing when a man points his finger in some direction.

Diamond Cut Diamond.

In the days gone by they had been sweethearts; but, alas, hatred is ever akin to love, and the relationship had changed in this case.

One day the former lover had to make a business call on the girl's father and, of course, it so happened that she answered the door.

"I beg your pardon," said the young man, keeping his nerve in the trying circumstances remarkably well. "Miss Perkins, I think? Is your father in?"

"No, he's not, I'm sorry to say. Did you wish to see him personally?" asked the maiden, without the slightest sign of recognition showing in her eyes.

"Yes; but it will do tomorrow. Thank you. I will call again! Good afternoon!"

But this was too much. As he reached the bottom step the lady spoke:

"Pardon me! Who shall I say called?"

As the Youngster Saw Him.

Here is another proof that we can never see ourselves as others see us. This time it is supplied in a story told by Congressman Claypool of Ohio.

"Some time ago," said the congressman, "the ticket agent of an Ohio railroad was called to the brass-barred window of his little office. Before the window stood a motherly little woman. Beside her stood a bright-faced boy.

"Please, sir," said the motherly little woman, addressing the agent, 'what time does the next train leave for Columbus?'

"It leaves at 2:48, madame," answered the agent with a slight air of annoyance. 'I have already told you that no less than six times in the last hour.'

"I know you have, sir," gently returned the motherly little woman; 'but Johnny likes to see you come to the window. He says it reminds him of the zoo.'

New Asparagus Product.

Cellulose is now recovered from the waste of asparagus canning factories by the recently discovered process of Otto Reinke of Hamburg. He also makes use of the stalks which mature after the edible crop is gathered. Heretofore these residues have been practically worthless, except as fertilizers, as they have but little nutritive value when used as coarse paper or packing materials have not resulted satisfactorily. After undergoing a comparatively simple mechanical and chemical treatment they yield a beautiful pure cellulose, which may be used for bandage, blasting material, paper, tissues, fine felt, cardboard, etc.

THE CHILDREN

THOUSANDS OF DRAGON FLIES

Queer Sight Witnessed by a French Naturalist While Making a Tour Through Morbihan.

A professor of zoology at Lille, M. Charles Barrios, was making a tour through Morbihan, in France. As he was walking along the road he noticed that a multitude of dragon flies were alighting on the telegraph wires. The singular thing about it was that they all rested at an equal distance from each other, and all occupied the same position, with head turned toward the west.

From all sides the dragon flies arrived and always placed themselves in the same position, and at the same distance from each other. They remained as if glued to the wire, motionless and paralyzed. Each new arrival flew over the fixed bodies of the others and took its place in the line.

This chain stretched itself out toward the west, and turned toward the setting sun. Professor Barrios followed the route for a long distance and found the same strange phenomenon. He estimated the number at 60,000, at least. At an abrupt turn of the road to the south, the telegraph line turned also. There not a dragon fly was in sight! The wire was absolutely free from them! With the change of direction it seemed to have lost attraction for them.

Was this chance? Did the electric currents running from the east to the west exercise any influence upon these insects? Was it the solar reflection? Explain it, who can. In any case it would be interesting to know whether this phenomenon be an isolated one or not.

KING'S SIGNPOST IS QUIANT

Surmounted by Device in Oak, Depicting the God Tyr and the Great Mythological Wolf.

The illustration shows a signpost remarkable for its decorative qualities which King George of England has just had erected by the roadside near Wolferton railway station on the Sandringham estate. The post is surmounted by a device in oak, carved, painted, and gilded, depicting the god

A King's Signpost.

Tyr trying to wrench his arm from the jaws of Fenrir, the great mythological wolf of the old Norsemen, after whom, it is supposed, Wolferton was named. The wolf was symbolical of Fate. In the background is a representation of the gilded rooms of Asgard.

RIDDLES.

Why are fishermen and shepherds like beggars?
Because they live by hook or by crook.

Why is a thief picking a corner's pocket reminded of a line in Othello?
Because "who steals his purse steals trash."

Why is a shoeblack like an editor?
Because he polishes the understanding of his patrons.

Why is a whisper like a forged note?
Because it is uttered but not aloud (allowed).

When is a sheep like ink?
When you take it up into the pen.

What is the best way to keep a man's love?
Not to return it.

What is a button?
A small event that is always coming off.

What are the most difficult ships to conquer?
Hardships.

Why is an ass the most unfortunate creditor?
Because he gets nothing in the pound.

Why have we reason to doubt the Giant's causeway?
Because Ireland abounds with sham-rocks.

To Make Sea in Sahara Desert

NOW that the Panama canal is nearing completion, scientists are directing attention to another gigantic and fascinating engineering proposal, the reclamation of the great Sahara desert in North Africa.

As far back as the time of De Lesseps, who designed the Suez canal, a French engineer, Colonel Roudaire, broached the project of letting the waters of the Mediterranean into the desert of Sahara and forming two lakes in central and southern Algeria. The project of the Suez canal approved that design, and now comes Professor Etchegoyen of Paris with a striking scheme, that of converting the whole vast desert into an inland sea. The work would present no great mechanical difficulties, he says, because the coast land is composed of sand and soft rock formations. The consequences of this piece of engineering would be gigantic.

The first result would be to add a great new colony to the possessions of France. Millions of human beings could support themselves therein in comfort, since, with the lack of water supplied, the desert shores would become as fertile as those of Europe. Fleets of steamships would navigate the Sea of Sahara, a sea varying in depth from ten to sixty fathoms, and build up a flourishing trade between Algeria and French West Africa. And the most remarkable result of all would be the alteration of the climate of all northern Africa from equatorial extremes of heat to the pleasing temperature of Natal.

Might Transform Climate.
Professor Etchegoyen's scheme has provoked much comment, and objections have not been wanting. Certain meteorological experts cry out in horror that any tampering with weather conditions in Africa would transform the climate of Europe; that, if tropical Africa should become temperate, Europe would become Arctic, and an alarming picture is drawn of England, Belgium and Denmark lying under several feet of perpetual snow and their inhabitants either emigrating in haste to milder countries or leading thenceforth the lives of Eskimos. A still more striking reason for leaving the great desert alone is presented in the argument that, by the displacing of so many billions of tons of water, the equilibrium of the earth would actually be affected, and the engineer who had undertaken the task of adding a new sea to the map of the world would forever after be cursed by humanity for having altered the axis of the globe.

A DESERT CAMP

manity for having altered the axis of the globe.

However, in any discussion of this interesting question, it must be borne in mind that, since by far the greater part of the Sahara is from seventy feet to more than a mile in elevation above ocean level, and that those tracts that lie below ocean level are chiefly valleys between the hills and mountains or the basins of ancient lakes never very extensive in area, a Sahara sea would consist only of an exceedingly irregular body of water containing many islands and extending into the unflooded districts in a multitude of bays and coves. It would be considerably less than one-third the size of the Mediterranean. And now there recurs the question of the possible physical influences of such a sea.

Area of 250,000 Square Miles.
If the Sahara sea should have an entire area of 250,000 square miles, with a mean depth of 200 feet—and both estimates are generous—it would contain about thirty-five billion tons of water. Whether the canal were cut to the north coast of Africa or to the west, the flooding would be gradual and the level of the Atlantic would be speedily re-established. Of course thirty-five billion tons seems a great deal of water, but in proportion to the bulk of the earth it is utterly infinitesimal, and compared with the volume of the ocean it is as a drop out of a pailful. A little reasoning, or experimenting with globes or balls will show that, since the

PRODUCE FOR MARKET

Several Important Points in Proper Preparation.

Farmer Never Loses by Honestly Packed Farm Truck—Each Package Should Be Filled With the Same Grade Throughout.

(By S. B. SHAW.)

Packing is equally as important as any of the other operations involved in the preparation of fruits and vegetables for market. There are several important points in connection with this work worthy of consideration, probably the most important of which is honesty. "Every grower's pack should be as good as his bond." Customers want honestly packed goods and they are usually willing to pay good prices for them. A grower never loses by placing honestly packed produce on any market, be it at home or abroad.

Each package should be filled with the same grade throughout. If this is done the top may be "faced." "Facing" is the arrangement of from one to three layers of fruit on the top, thus increasing the attractiveness of the package. This is an honest and perfectly legitimate practice provided the entire contents are fruits of the same grade as those placed on top. "Seconds" and inferior grades should never be "faced" with "prime" specimens.

Poorly Packed Potatoes and Cabbage Packed Too Loosely.

There is neither cash or character in this practice. A few seconds or culls scattered in with a lot of fancy specimens gives the buyer an opportunity to discriminate against the whole package and ruins the reputation of the grower as an honest packer.

Produce should be cool and dry before being packed. Heat and moisture promote decay. Conditions of this kind should be guarded against, for decay means loss. Allow all fruit and vegetables to cool in the packing house, and have them dry before packing. They will keep longer and present a better appearance at the time of sale if handled in this way. So much of the success in marketing farm products depends upon the packing, that growers cannot be too particular in seeing that this work is done in such a way as to show their produce to best advantage when put on sale. While it is of the utmost importance that each package be filled with the same grade throughout, it is equally as important that it be done carefully. With the softer varieties of fruit and vegetables, such as peaches, plums, tomatoes, egg plant, that are usually put in small packages, each specimen should be placed by hand. This not only makes the pack more attractive, but it lessens the liability of damages resulting from bruises. Produce of a firm nature, as apples, potatoes, etc., will not bruise so readily, and as a result it is not so necessary to handle each individual specimen in packing.

SUMMER RATION FOR HORSES

Feeding Ear or Shelled Corn Would Be More Desirable Than Grinding—One Good Combination.

If corn must be fed to the horses, grinding it will not pay, unless the horses have poor teeth, in which case it might be advisable. Feeding the ear or shelled corn would be the more desirable method of feeding.

Crushed corn and cob meal is not as good because of the cost of crushing, and the amount of food value secured from the cob is so small that it does not make up for the energy required to digest so much crude fiber.

A combination of corn, bran and a little oil meal make a good summer ration for horses. Feeding a 1,000-pound horse about ten pounds of corn and three pounds of bran per day would be equivalent to 14 pounds of oats, although it contains a little more carbohydrates and less protein, thus making a little wider ration. A small amount of oil meal would offset this, however.

Bulky Food for Hens.

Hens need bulky food. Clover or alfalfa hay cut in half inch lengths helps to make an ideal ration. If cooked and mixed with bran it makes an excellent breakfast. Clover and alfalfa not only promote digestion but also largely assist in supplying the elements necessary for the albumen.

Can Handle Hogs.

The dairyman can handle hogs to splendid advantage. That's one reason why he is able to make such a good profit. It is due to the side lines.

Rest for Horse.

Unless the farm horses have a chance for proper rest at night they soon become weak and lose weight.

FOR HER HAPPINESS

Story That Contains a Moral to Be Heeded by the Socially Ambitious.

It was a very happy life in the small town when the husband's salary was \$75 a month and the unpretentious white house set back among the trees was their own. The house was full of laughter and love in those days. The wife's parlor was the pivot around which the town's social life revolved. Her sway was unquestioned.

Yet it was she who urged her husband to go to the city. She had friends in the city. Some of her friends were on the outer edge of what is termed society. But she found that that fact did not put her on the outer edge. Her husband's income was five times what it was in the small town; yet it was not large enough. They had a pretty apartment and a competent servant, but that was not enough—in the city. She could not do the things she wanted to do. She could not buy the things she prized.

"If I had your chances," she would sigh, "I could make more money. I could do more for my wife."

That was her refrain; that was her grief. She belonged to that great army of nobodies who long to be somebodies. Her end and aim was to be "among those present." Yet she did nothing to mend matters. She merely sat and fretted. She had no resources within herself nor did she care to have any.

"If we are to be anybody at all, we must have an automobile," she told her husband at dinner one night.

"But, Leola, dear, it is pushing me pretty hard to meet our necessary expenses."

"An automobile is a necessity these days, Ralph."

"But, my dear—" Looking up, the man saw the fretting lines in the woman's face, and the hunger in her voice went to his heart.

"I'll do the very best I can," he replied slowly.

In a month they had an automobile. Yet Leola was not satisfied. She must have a chauffeur. She was perfectly right. The car was of little use to her without somebody to run it. In another month there was a chauffeur. The husband was frequently late to dinner, but the wife hardly noticed that fact; she was often late to dinner herself. There were tired, anxious lines in his face, but the woman hardly noticed them. There were tired lines in her own face, come from trying to do "what was expected of her."

"Really, I can't entertain in this little apartment," complained Leola. "I must have a larger and more modern apartment or a house."

"Leola, we have reached our limit. I cannot make another cent honestly."

"Then make it dishonestly, but make it," the woman smiled half-teasingly, half-eagerly.

Her husband looked at her long and earnestly. He saw the feverish desire in her eyes; he saw the ambition-racked plea of her mouth. When he took her in his arms, a privilege for which he found little time now, he felt the quiver of her nervous little body.

A month later they moved into a fifteen-room apartment in a huge apartment building, topped with a magnificent roof garden and where the twentieth floor was given over to a playground for the children and the nineteenth floor harbored a swimming pool, Turkish baths and other proper fittings for the wealthy.

But Leola was unhappy. Still she had not pierced the magic circle that so attracted her.

"Ralph, we must have a country place," she coaxed.

"It is absolutely impossible," replied the husband. "We are hopelessly in debt. I am involved in a transaction now that makes me blush to think of—and just because I must have the money. I can't go a step farther, little girl."

It was seldom that he called her "little girl" now. Old pet names seldom crossed his lips these days.

"But, Ralph, nobody stays in town in the summer, and the Giesys have a place at Sweet Forest, and if we mean to keep up our end we must have one, too. Couldn't we save a little somewhere else to make up for it?"

Ralph Blair smiled faintly, kissed his wife gently on the forehead and went downtown to figure it out.

"Your signature means just \$20,000," said the dark-haired, sharp-eyed man.

"But I can't sign it honestly," said Ralph. "I think your scheme is unlawful. I think it is thievery."

"I'll give you thirty thousand for your signature," purred the soft, persuasive voice, "and I will see that those notes that are bothering you at the bank are taken care of."

Ralph paused. Other men that he knew did questionable things and they were accounted responsible, honest citizens. Why not he? A vision of a worried, unhappy face rose before him. His wife's plea for a country place tugged at his sleeve. His back was against the wall. He was fighting for—her happiness.

"I'll think it over," breathed Ralph Blair hoarsely, while beads of perspiration stood out on his forehead. Then he sat for hours at his desk mulling incoherently over a photograph of an unpretentious little white house set back among the trees in a country town.—Buffalo Express.

PROFIT SHARING WORKS WELL

Method of Stimulating Interest of Employees in Business Is Growing in Popularity.

Business as formerly conducted on a modern scale permitted that acquaintance between employer and employee which became a personal bond and attached the worker loyally to the establishment. This is impossible with the giant concerns of today, and the progressive among them are looking to the principle of profit sharing to interest the employee in his work. In England, where the plan is much in vogue and tends to become the settled practice, the profit sharing system is expected to enable the small shop or factory to compete, by reason of the more zealous endeavor of the employed, with the huge establishments; and it seems not unreasonable that it may have this effect. Many corporations in our own country have worked out satisfactory profit sharing plans, or are experimenting to that end. A carpet company of Yonkers distributed \$65,000 to employees last year. A big insurance company has inaugurated a retirement pension system which gives the employee 1 per cent. of his yearly earnings multiplied by the number of years of service. A New England manufacturing concern, after allowing a liberal return to capital, gives all its surplus to its employees; and various other plans are being tried. Beyond much doubt these will become the universal practice in the future, when the men whose great ability can make huge enterprises successful have come to find the higher pleasure in serving humanity.

Heretofore in world history human development has been toward individuality, and this was facilitated by everything which tended to exalt and aggrandize self. Up to a certain point it was necessary and good; but beyond that, development to the ideal type of man is retarded. It is along the altruistic, not the egoistic, lines that further progress must be made. The present disposition of directive heads of great concerns to serve themselves first and pass out to others what remains, if anything, is illustrated by the seven directors of a large New York company, who vote themselves each a salary of \$30,000 a year, though the stockholders would seem to be getting nothing since a deficit of \$2,000,000 was reported in 1911. This kind of profit division has always heretofore been most in evidence, but will not always be.

When Your Eyes Need Care

Try Murine Eye Remedy. No Smarting—Feels Fine—Acts Quickly. Try it for Red, Weak Watery Eyes and Granulated Eyelids. Illustration in each Package. Murine is compounded by our Oculists—see a "Patent Medicine"—but used in successful Physicians' Practice for many years. Now dedicated to the Public and sold by Druggists at 50c and 60c per Bottle. Murine Eye Remedy Co., Chicago.

Happiness in Work.

To augment human happiness, a writer in the Edinburgh Review remarks, must be the purpose, main or incidental, of every person. Absolutely incidental with most, it must be believed. The activities connected with the business of living in a world with other men and women absorb us. Happiness is a by-product of these activities of the common life.

To Break in New Shoes.

Always shake in Allen's Foot-Ease, a powder. It cures hot, sweating, aching, swollen feet. Cures corns, ingrowing nails and bunions. At all druggists and shoe stores, 25c. Don't accept any substitute. Sample mailed FREE. Address Allen S. Olmsted, Le Roy, N. Y.—Adv.

Worth Extra Time.

"Prisoner at the bar," said the judge, "is there anything you wish to say before sentence is passed upon you?" "No, my lord, there is nothin' I care to say; but if you'll clear away the tables and chairs for me to thrash my lawyer, you can give me a year or two extra."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period. Adv.

Rio de Janeiro will install a pneumatic tube system for the distribution of messages and telegrams about the city, the topography of which interferes with speedy work by messenger.

WINCHESTER

20 GAUGE

HAMMERLESS REPEATING SHOTGUN

The Model 1912 Winchester is the lightest, strongest and handiest repeating shotgun on the market. It weighs only about 5½ pounds, yet it has great strength, because its metal parts throughout are made of nickel steel. It is a two-part Take down, without loose parts, is simple to operate and the action works with an ease and smoothness unknown in guns of other makes. See one at your dealer's or

Send to Winchester Repeating Arms Co., New Haven, Conn., for circular.

THE LIGHT WEIGHT, NICKEL STEEL, REPEATER.

"You're Safe"

so long as you keep the Stomach, Liver and Bowels working regularly and when the first sign of weakness appears be sure to take

HOSTETTER'S STOMACH BITTERS

promptly. It will help you keep the appetite normal, digestion perfect and liver and bowels active. Try it.

The world's supply of emery comes from Greek islands and from Asia Minor, near Smyrna. Importations into the United States, which average \$250,000 annually, have been hampered within the past year because of disturbed conditions in the Balkans and the withdrawal from industrial life of so many men for the army.

In support of the project for a floating sanatorium for English consumptives the argument is advanced that the patients' minds would be beneficially diverted by the changing scenes as the vessel passed from one place to another.

Almond production in California this year, according to the California Almond Growers' Exchange, will be about 1750 tons, or something over half a normal crop.

WOMAN IN TERRIBLE STATE

Finds Help in Lydia E. Pinkham's Vegetable Compound.

Bellevue, Ohio.—"I was in a terrible state before I took Lydia E. Pinkham's Vegetable Compound. My back ached until I thought it would break, I had pains all over me, nervous feelings and periodic troubles. I was very weak and run down and was losing hope of ever being well and strong. After taking Lydia E. Pinkham's Vegetable Compound I improved rapidly and today am a well woman. I cannot tell you how happy I feel and I cannot say too much for your Compound. 'Would not be without it in the house if it cost three times the amount.'—Mrs. CHAS. CHAPMAN, R. F. D. No. 7, Bellevue, Ohio.

Because your case is a difficult one, doctors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It surely has remedied many cases of female ills, such as inflammation, ulceration, displacements, tumors, irregularities, periodic pains, backache, and it may be exactly what you need.

The Pinkham record is a proud and peerless one. It is a record of constant victory over the obstinate ills of woman—ills that deal out despair. It is an established fact that Lydia E. Pinkham's Vegetable Compound has restored health to thousands of such suffering women. Why don't you try it if you need such a medicine?
